

# Magic Mouthwash

Painful ulcers?  
Oral thrush?  
Radiation Therapy sores?

**If you are suffering from any of these, Magic Mouthwash may be for you...**

## What is Magic Mouthwash?

Magic Mouthwash refers to a number of specialized mouthwash formulations used in the treatment of many different oral conditions. There are formulations that help to relieve pain associated with mucositis or oral ulcers. There are also formulations that are effective in the treatment of oral fungal infections. Formulations of Magic Mouthwash may include: antibiotic, antifungal, antacid, anesthetic, and/or anti-inflammatory.

## How do I use Magic Mouthwash?

Magic mouthwash is to be used orally. Most formulations are used every 4-6 hours and need to be held in your mouth for 1-2 minutes. It is recommended that you do not eat or drink for 30 minutes after using magic mouthwash. This will allow the medication to remain active at the site of the affected area and to produce the desired results.

## How can I get Magic Mouthwash?

Some Magic Mouthwashes contain only over the counter products and do not need a prescription. Others contain prescription medications and need to be prescribed by a physician or dentist. We will work with your physician or dentist to compound the best formulation for you.

## Is it covered by my insurance?

Magic Mouthwash contains a mixture of several different medications to help soothe irritated areas in the mouth as well as to treat certain oral infections. Some of these medications may be covered by your insurance. We will give you an itemized claim form to turn in to your insurance company for possible reimbursement.

## What are the side effects?

Some possible side effects may include a burning or tingling sensation in the mouth, diarrhea, nausea, constipation, and/or drowsiness. Variations in side effects may occur depending on the formulation of your mouthwash. If you are instructed to just swish and spit out, you are less likely to experience any of these side effects as opposed to swallowing the mouthwash. Your pharmacist will provide you with information regarding your mouthwash.

## What flavors are available?

We can add a flavor of your choice in order to make the mouthwash taste better. Some flavors include: strawberry, lemon, raspberry, chocolate, and mint.

## Can I buy this at any pharmacy?

Magic Mouthwash is not available at all pharmacies. These formulations are specialized for each individual patient. We are a compounding pharmacy specializing in individual needs and will work with your physician to formulate the Magic Mouthwash for your condition. Please contact us for more information.
